## Revisions

Green	Information Correct and checked to panel on locomotive
Orange	Needs to be checked

## Notes

Strike	Internal NMBS/SNCB 28xx number removed
Gray	Passenger Locomotives For Amsterdam Centraal - Brussel Zuid Service
Tan	No longer on a NMBS/SNCB lease.
P	Worked on a passenger train available to the public
C	Worked a Charter Train
YW	Years out of Works [decimal years]
*	2802 to 2813 are fitted with SW 9.4 for working top and tail on the Benelux services

It is likely that the lease between NMBS/SNCB and Alpha Trains for the twelve HLE 28s used on the Benlux Trains will finish at the end of 2024.

Note:- Originally all the Type 28s and 29s were leased from Alpha Trains by NMBS/SNCB. The locomotives were then sub-leased by B-Transport and the semi independent B-Logistics.

All the series 2814 to 2843 have ceased to be leased by NMBS/SNCB and have been returned to Alpha Trains.

Railpool has a deal to supply TRAXX locomotives to Lineas which have replaced the Alpha Trains TRAXX locomotives. However, in some cases, the ex-28xx series locomotives have continued to run with Lineas on a direct Alpha Trains - Lineas short term rent or lease.

A new direct Alpha Trains - Lineas lease is what has happened to 186 346, 347, 348, 349 and 350.

**TRAXX locomotives get a R1 Revision at 1.2 million kilometres and a R2 Revision [R12] at 2.4 million kilometres.**

The revision work mainly involves the wheelsets where the solid wheels are replaced. The bogies are dismantled and the wheelset is placed on a machine that pushes off the wheel. Then new wheels are pushed back onto the axle. Other components are also replaced on the bogies as well as inside the loco. In the past TRAXX locomotives got a Revision at the end of their eight year revision period regardless of the distance travelled. This was a throw back to the days of steam and the life of a boiler. This over prescriptive need for a Revision at eight years has largely been dropped.
