

U.S. Models *Exclusive*

ME *Modern Gala*

It is now six years ago that LS Models has decided to invest into a great comprehensive program regarding the CIWL.

We strive to archive a very high level of reproduction, the same elaborated level, the rolling material and the belonging trains were representing at their time: Passing borders without changing trains (which was exceptional regarding the difficulties experienced when just passing between countries), comfort and security.

A continuous improvement of materials, the passion for service and the possibility of bracing yourself have altogether slowly but continuously formed the luxury image, the company is associated with still today. The name of these trains is so well known, that they became a part of the public culture, even in the least area of train related circles.

Our efforts for perfection in making models have been interfered by some missing documentation. Unfortunately the "compagnie des waggons-lits" did not put much effort in conserving their archives. At least the information has been diluted, at worst some materials are destroyed.

Slowly we had been able to carefully collect various information, plans and drawings, historic inventory numbers, verify the findings and finally correct some errors which can be found on a regular base in publications. All this built up into a very unique pool of documentation which allows us to construct our models strictly following the prototypes. All changes and improvements, the prototype material has experienced in his long life will be reflected in our models which are even nearer to the history than some existing real cars.

Of course this historic work takes time. Time which contributes to the delay of our models. Time we know is maybe too long for you.

Another drawback do form the copyrights, the group "waggons lits diffusion" is claiming. To license these rights, a fee of ten percent of the sale price is due to the group, they ask for a minimum of 20.000 Euro per year. This has even a double influence. These fees increase the sales price of our models and the lack of this money delays further investment.

Since the beginning we have made the P cars, which were unique cars in the company, made from stainless steel. We have made the F cars which constantly surprise because of their small size. We made the S cars which represent the biggest series of cars with the longest life, therefore you will find infinite variations of them. And we made the Y cars the newest classic cars.

Our program continues. In 2014 the restaurant car 3341, the Pullman cars "Côte d'azur" will be available, followed by sleeping cars of the type MU_{nn} MU and Z. The Y series will be continued with first versions of the flat chassis.

In 2015 the restaurant car BREDA with 42 places, the metal baggage car with eight doors and the sleeping cars Lx will join our product line. In 2016 the Pullmann cars "ETOILE DU NORD" are on the list, a list we are going to complete with restaurant and baggage cars so we can precisely form train compositions (Train Bleu, Nord-Express).

And we are going to continue. For the time being we have reproduced most of the metal cars of the CIWL.

For the N gauge we try to realize the same program but sales volume of models will be the limiting factor here.

Finally let us make a comment on our business policy. If there is enough demand for a second product run of an existing model we will be happy to do so, maybe with the exception of some very specific cars, which would require a major change of the mould. So don't hesitate, your dealer will be happy to take your orders.
